

ACA External Committee Reports 2025

Hamish Murray – AS/NZS 2890.1 Parking facilities - Off-street car parking

There was an initial delay with our friends over the ditch in New Zealand with a delay of the public exhibition of the standard.

The exhibition has now occurred and the appropriate changes to the standard made.

Since then, it has gone into hibernation, and it is currently on hold prior to going to ballot and publication.

Mark Relf & Eric Martin - ME004 Committee for lifts

The ME004 Committee for lifts has had a reasonably quiet year with few meetings but the update of AS1735.12 appears to have stalled as the desire to refer to EN (European) standards and add Australian appendices is not resolved and the current proposal is not consistent with Australian requirements and does not have the committee support.

There remains a continuation of acceptance of EN standards re various details related to lifts, but most do not affect access for people with disabilities.

The committee has yet to develop project proposals to revise AS 1735 part 7, 14 and 12 standards.

Dale Sheppard CS-005 Playground Committee

Dale has only just joined the committee in August, so no report issued
